Become Bee Friendly

Bee Friendly is an initiative aimed at communities and community organisations, schools, public bodies, town and community councils, businesses, universities and colleges, places of worship, and many other organisations, all around Wales.

Bees, butterflies and other pollinators are an essential component of our environment. Due to a variety of factors, numbers have declined and pollinators are now in trouble. The good news is that you can help. Becoming Bee Friendly will give pollinators what they need to survive and thrive, and by working with others we can make Wales a pollinator friendly country.

Whether you are a part of a Bee Friendly scheme, a member of one of our many supporter organisations or a concerned individual, take a look to see what actions you can take to make our world a little bit greener – discover the Bee Friendly Action Guide, FAQ, application form and plant list from the website below.
