

Climate Change Resources

Many of the world's greatest challenges, from poverty to displacement, wildlife extinction (including bees and pollinators) to extreme weather events, are being intensified by climate change. By learning more about the science and geography that affects our world, and the decision makers and organisations who have the power to champion change, we want young people to embark on an educational journey to understand what needs to be done, to recognise what matters most to them and to take action to help protect the places, animals and things they love.

There are educational resources below to help you learn about climate change, and what you can do.
