

Resources

Watch videos 1, 2 and 3 on this YouTube playlist for more information about vaccines:

<https://www.youtube.com/playlist?list=PLvrb9iOILTQbWnCdkVOZiv9KURxNc3rPo>

Method

- 1 Work your way through the information sheet below
- 2 Ask the children to complete the tasks
- 3 Encourage the children to ask questions if they don't understand something
- 4 Ask the children to find out what vaccines they had as a child and fill in the bottles
- 5 Once the tasks have been completed, fill in the Certificate of Appreciation

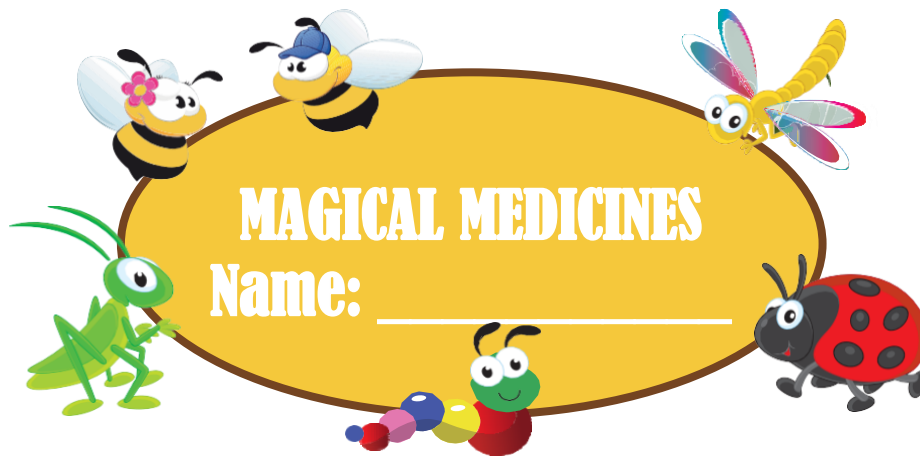

Learning Outcomes

- 1 Learners will develop a basic understanding of vaccines;
- 2 Learners will understand that vaccines have been used for many years, and are safe and vital for preventing disease;
- 3 Learners will discover that they have likely already had many vaccines themselves, and will learn which ones they have had;
- 4 Learners will understand why it is important for vaccine deployment to tackle American Foulbrood in Honeywood.

The Bumbles of Honeywood is a set of books, activities, and merchandise to introduce children to important life skills such as entrepreneurial skills, creativity, teamwork, determination and self-confidence.

Sometimes, germs like bacteria and viruses can get in our bodies and make us sick!

We can sometimes fight the germs and get better by a process known as immunity. Immunity is a mechanism which our body develops to fight the germs.

When we cannot fight the germs, we become sick!

A long time ago, scientists developed medicines called vaccines.

Vaccines protect us from becoming sick. They work by turning on your immunity without you becoming sick.

When you get a vaccine, you develop immunity against a specific bug.

This means you will not get sick if you meet the bug in the future.

You got lots of your vaccines when you were a baby.

Ask your parents which of the vaccines below, you were given, and colour them in.
